New York, Aug. 1.—(Special).—It appears that the "White Ghost," by which name John A. Drake's automo-bile is known far and wide, as a hoodoo and trouble maker is positively irrepressible, whether it is in the hands of a chaffeur or is left to its own resources. Today Charles C. Gates received the following telegram from Saratoga, where his father and Mr. Drake have just arrived for a stay during the racing season: Broke Loose

"The automobiles got here yester-day morning. The 'White Ghost' got loose in the' car and smashed both the other machines. Don't know how badly. J. W. G. (John W. Gates) and J. A. D. (John A. Drake) gone over to look at them before accepting them from the railroad company."

#### MOST SWEEPING INJUNCTION YET

PREVENTS MEN FROM MARCHING

Restrains Defendants From Parading in a Body at or Near the Mines of the Coal Companies or Assembling In Large Bodies.

Charleston, W. Va., Aug. 1 .- President John Mitchell, practically every officer in the United Mine Workers, all strikers and strike sympathizers were enjoined from interfering with workers at the fifty mines in the New River field.

The injunction is the most sweeping yet issued against the striking miners. It forblds going upon mine property, holding meetings, or asking miners to quit work.

The bill in equity was filed in the federal court by the Chesapeake and Onio Coal Agency company, a New Jersey corporation. Fifty coal companles operating in the New River fields, the Chesapeake and Ohio railway company, G. W. Purcell, W. B. Wilson, John Mitchell, J. W. Carroll, J. A. Richards, and 150 members of company from Delayan a part of last the United Mine Workers of America

Mr. C. D. Fitch and daughter Priscilla, spent Sunday at Jefferson.

Miss Jennie Irwin, of Chicago, is the guest of Mrs. W. J. Jones.

Mrs. Geo. Clark, of Janesville, is visiting Mrs. W. A. Dean.

The school house in the village is the intermediate of the petition.

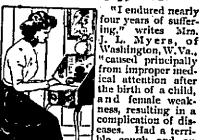

The school house in the village is the defendant railroad company for the shipment of the coal so purfor the shipment of the coal so purchased; that the coul is resold under contracts to manufacturing concerns and to the vessels; that because of a strike in the mines the coal companies for deliveries of coal; that there exists a secret organization known as the United Mine Workers of America, of which John Mitchell is president and W. B. Wilson is secretary, under the orders of which the men employed in the mines who are members of this organization have quit work and refused to do their duties, and in addition thereto assemble in marches and meetings and so conduct themselves as to intimidate employes of the varfrom going to the work which they desire to perform, and the said defendants occupy the tenement houses of the various companies and fall and refuse, to vacate them at the request of the coal comparies owning them.

The bill was presented to Judge Kelfer and he made an order that a temporary order is allowed, restraining and prohibiting the defendants, G. W. Purcell, W. B. Wilson, John Mitchell, J. W. Carroll, J. A. Richards and others, named in the order, and all others with associating or acting with them, from friends in Janesville. Her daughter in any way interfering with the management or operation of the mines by the owners or those operating them.

The defendants and all others associating with them are further restrained from entering upon the property of the owners of mines and coke plants for the purpose of Interfering with the employes thereof, either by intimidation or by the holding of little daughter Marion of Monroe, upon said property, or in any way and Mrs. Nora Zweifel, of Dayton, molesting, interfering with, or intimidating the employes of the coal companies so as to induce the employes to abandon their work, or to prevent any person to enter the employment of the coal companies, or to work in the paths, approaches, and roads upon

panies, defendants, or either of them, as to intimidate any person at work or desiring to work for either of the coal companies, and from being a part

of such body of men. The purpose of this restraining order, Judge Keller says, is to prevent unlawful combinations or conspiracies and to restrain all of the defendants engaged in the promotion of such unlawful combinations and conspiracies and all other persons from entering upon the properties of the coal companies and from in any way interfering with the employes of the coal companies, and from in any manner inciting persons who are working in the mines or coke oven plants to cease work and from preventing persons who desire to work in the mino<sup>11</sup> i wrote Dr. Pierce regarding my case, and received a prompt reply, free."

THE DUTY OF REPUBLICANS The fact that a LoFollette cinvention exhausted every effort to drive out of the party all members of it. who would not endorse LaFollettelsm and the more significant fact that the effort failed, is worth considering from the standpoint of party loyalty.

If the delegation at the convention who refused to endorse the governor's platform, had bolted the convention, they would have been subject to severe criticism and Sen Spooner would be classed today as a bolter. They acted wisely and their dignified bearing, when insult was added to injury, spoke volumes for conservative Re-

These men felt the responsibility of duty and recognized the fact that If the party is to be saved from self destruction, intelligent and unit-ed effort would be necessary. They ing to get left. realized that the governor represent ed but one branch of government and that the least important. When ne stood before them in the attitude of a despot, and questioned their loyalty unless they would bow in meek submission, the thought was impressed that Republicanism had fallen from its high estate.

Gen. Winklers letter expressed the sentiment of Republicans throughout the state. The governor's answer will have nothing to do in changing this sentiment. LaFolietteism has gained temporary control of the executive branch of government, but it has not absorbed the Republican par-

ty and never will.
The duty of every Republican in the state, who places party welfare above personal ambition, is to stay by the party and see to it that a legislature is elected which will represent Republicanism. This will not be done by

forming an alliance with democracy.

If the party is to be redeemed, it must be from elements within the party. The governor accomplished nothing during his first term of office, but a disturbance, and he will accomplish less during his second term. Under the exultation of cheap victory, he has shown his hand and many of his admirers turned away in disgust. He aspires to succeed Senator Spooner and poses as the friend of the masses. His ideas of reform are a travesty and will never be rerowned

#### COSTLY FIRE ON ${f WOODRUFF}$ ${f FARM}$

LARGE HORSE BARN AND WAGON HOUSE TOTALLY DESTROYED.

#### BARN WAS FILLED WITH HAY

The Loss is Estimated at Between \$3,000 and \$5,000-Brave

Work by Firemen. A fire that did from three to five thousand dollars damage broke out this morning about eleven o'clock at the Woodrum farm and before it burned itself out destroyed a large horse barn, together with the joining wagon house and sto

The fire was discovered shortly be fore eleven o'clock by Mrs. George Woodruff who was alone in the large house near the barn at the time. The men were all at work in the fields and Mrs. Woodruff picked up the dinner horn and blew it vigorously to attract their attention. They heard the horn and saw the fire and leaving everything they rushed to the house to render all the assistance possible. When they reached there the fire was burning in the hay loft in the south-west corner of the hullding and had not yet communicated to the carriage house or to the lower story of While one of the men jumped onto a horse and rode down to box 131 at the corner of Washington streets and Magnolia avenue to turn in an alarm the rest busied themselves in getting everything pos-sible out of the burning building. There was only one mare and a colt ia the barn and they were got out by George Woodruff, Jr. The other men succeeded in getting all of the buggles and sleighs out of the carriage house so there was much loss in this direction.

When the department reached the farm after their long run, the entire building was in flames and there was no hydrant within half a mile. Chief Spencer saw at once that the bullding was doomed and turned his attention to saving the immense cattle barn to the north of the burning barn and the smaller adjoining buildings. Fortunately what wind there was

was from the northeast and helped carry the flames away from the other bulldings. • The mg cattle barn north of the burning building was the one most in danger and for a while it looked as if it would surely catch fire, the heat was so great,

It was separated from the burning building by a forty toot alley and it was almost impossible for the firemen to go between them. All the pails about the farm were pressed into service and filled with water, which was carried to the firemen who were inside of the big para, wetting down the exposed end with the Babcock extinguishers and the water. Ludders were secured from the west. side truck and set; up against the building. Firehen protected with wet blankets ran up them and poured water on the places and poured water on the places where the fire seemed on the point where the fire seemed on the point. Give us a look on shirt waists, of breaking out. After about half styles and prices will impress you an hour the frame work of the burning building fell and after that the ing building fell and after that the danger of the big barn catching was The firemen are deserving of all sorts of praise for the way the fire was kept from spreading as the heat at times was almost suffocating. The extinguishers on the patrol wa-gon came in good stead, five charges being used during the fire. The burned buildings were the smaller of tne two barns and the carriage house. The barn was used for a horse and It was 75 by 32, two stories high, built of wood, the lower story being used for horses and contained seven box stalls. The upper portion was a loft in which was stor-

portion was a loft in which was stored about forty tons of new hay.

The carriage house was thirty by tairty-two, two stories high, built of wood, and was used to store buggies, sleighs, harnesses, farm implements and general tools.

Mr. Woodruff estimates his loss at from \$5.000 to \$5.000 partly covered by insurance. How the fire started is a mystery. As near as can be learned there was no fire in the building. A man named Fred Boeltke, who is raising tobacco on the farm occupied a portion of the carriage house for living apartments but said that there was no fire about this place, and, in fact the fire was first discovered in the corner of the huilding away from where he lived. Many advanced the theory that it was the result of spontaneous combustion caused by the new mown hay overheating. Mr. Woodruff stated that the edid not believe that his could.

young man giving his name as John Ward and claiming to have come from Missouri, but who evidently is, a smooth forger struck this last week and before he left manage ed to work two or three parties for sums ranging from \$20 to \$25 by the means of raised postal orders.

He struck this place last Tuesday and applied to G. W. Hudson, local agent for the Prudential Insurance Co. for a position as solicitor. Hudson being in want of a man just then took him on trial and went about the city with him for several days introducing him to the people doing business with the company. Cashes, Money Order

Last Saturday evening Ward went into Koerner Bros.' drug store and asked Mr. Koerner if he could cash a postal order for \$19.25 for him. He and that he was anxious to use it He explained that the postofilce was closed so he could not get In there and that it would be a great accommodation to him if he could get the order eashed.

Order Was Raised Mr. Koerner took the order, which was dated at Milton Junction and appeared to be all right, and alm the money on it. On Monday when Koerner took the order to the office to get the money on it they found that Ward had raised the order from \$1.25 to \$19:25.

The same night Ward went into
T. J. Ziegler's store and told them
the same kind of a story and succeeded in geting an order for \$25 cashed there that had been raised from \$2.50. He also succeeded in working another business house for about \$25. Leaves Town

After getting the money he went to his boarding house and secured his grip, telling the landlady that he was going off on a business trip and would be back Tucsday. This was the last seen of him about here. As soon as the steal was discover-

ed it was reported to the postal authorities and should the young man be caught it will go hard with him.

First Shock Comes at Midnight and Drives Inhabitants From Their Beds -Not a Single Pane of Glass Is Left In the Village.

San Luis, Obispo, Cal., Aug. 1.-The prosperous and fruitful valley of Los Alamos in the northern part of Santa Barbara county was devastated by a seismic disturbance. A strip of country fifteen miles long by four miles wide is rent with gaping ils sures and dotted with hills and knolls that sprung up during the night as it by magic. A' village is in ruins and hundreds of people are fleeing for their lives.

#### Opens Great Flasures.

Great fissures were run deep in the Hills and knolls appeared in level valleys. Springs of water broke out in places that had been dry. The general topography of the valley was greatly changed in many respects. The disturbance had no general direction, the mystory may be cleared up. It was preceded by a rumbling like BIGGEST TREE IN THE WORLD that of distant thunder, which increased until the earth began to rise and twist and the hills began to tremble.

With the first warning of the sound of the approaching disaster the terror-stricken people rushed into the streets and sought places of safety in vacant lots and roads. Many fled toward the neighboring hills. The first vibrations were similar to the ing it over fifty-one feet in diameter. preceding disturbances in direction and effect.

#### Earth Rolls.

They were immediately followed by the most terrific shock ever experienced in this section of the state. The earth trembled and rolled and twisted until it was impossible for people to stand erect, and the terror-stricken inhabitants crouched together in the darkness, fearful that the earth be-neath them might open and swallow

The terror inspired by the rumbling and trembling of the earth was increased by the sound of falling buildings, which gave some idea of the terrible destruction that was being

When the most serious shocks had passed and the rumbling sounds had died away in the distant hills the people gathered in groups about the ruins of their homes and places of business. When they saw the extent of the damage done, many of them, fearful of a repetition of this experience, immediately started on foot or by any conveyance that could be had for places where the previous shocks had been

#### Brick Buildings Fall.

In the darkness of the night it was impossible to determine the full extent of damage wrought, but with the dawn the stricken village had the appearance of the ruins of a city long deserted. The Presbyterian church, a substantial brick structure, had been leveled to the ground. Not one brick building was left standing.

Chimneys had toppled over. Frame buildings had been wrenched apart and thrown from their foundations. Telegraph and telephone wires had been broken. There was not a building in town that had not been damaged more or less seriously. In store buildings that were not totally destroyed the merchandise Was thrown from shelves, and everything breakable was destroyed.

#### Window Glass Broken.

Not a pane of glass was left in any window of any house in town. In frame cottages and dwelling houses left standing stoves were overturned and crockery and glassware destroyed.

A conservative estimate of the loss to property in the village is \$30,000. This amount will probably be greatly increased by the damage &sno property in the surrounding country. Each merchant in town has lost at least \$500 on stock and the damage to buildings has been great. The extent miles wide, but the shock was felt

Flee From Village. At the Western Union oils wells, on the Carriaga ranch, two tanks were wrecked and thousands of gallons of oll were lost. The disturbances continued throughout the day at intervals of about two hours, but none of the

shocks were severe. The people have deserted the village. Every conveyance has been taken. The passenger and freight trains that have left here since the severe shock have been loaded with people, who are fleeling to Santa Maria and the northern part of

the county for safety. Since the first disturbances on bunday night there have been over seven ty distinct shocks, and those who have been keeping records have now given up, as the disturbances have become almost continuous.

#### CORNER ON OATS REACHES AN END

SETTLING PRICE IS 64 CENTS

Three Twins Fall to Make Delivery On Contracts Aggregating 500,000 Bushels-Much Excitement Among Traders In the Pit. >

Chicago, Aug. 1.- Except for the ragged edges, which are likely to receive the attention of the directors of the board of trade and the civil courts for months to come, the long continued corner in July oats ended yesterday.

Unusual and unexpected complications prevented the sharp and clear cut closing which is the customary outcome of affairs of this sort. Litigation of one character or another is reasonably certain to follow, and it will doubtless be months before the cause celebre finally becomes a dead

That the deal was a financial success, so far as the principal "longs" are concerned, admits of little doubt, though they will be unable to determine just where they stand until bills for defaulted deliveries are settled. These defaults aggregated about 500,000 bushels.

#### Deliveries Are Exciting.

The "enjoiners," Waite, Thorburn & Co., were responsible for 300,000 bushels of the shortage, though they owed the three principal longs only 55,000 bushels. This would make them short in other directions about 250, 000 bushels.

The deliveries after the close of the session furnished the most exciting feature of the day. Three firms failed to make good on their July oats contracts to the extent of about 500,-000 bushels. The result was that scores of other houses were put in a position where they were unable to fill their contracts, although their books "stood even."

Seldom if ever, it is said, has such a mixed up state of affairs been experienced on 'change.

Settling clerks were all at sea, and it will take days, and possibly weeks, brokers say, before the tangle will be straightened out.

#### . Those Who Defaulted.

The firms which were reported as defaulting were: Waite-Thorburn (estimated), 300,000 bushels; Brass & Buckley (estimated), 100,000 busheis: Norton-Switzer (estimated), 100,000 bushels. In all there were between 500,000 and 600,000 bushels of July oats, mostly standard, delivered out by various houses. The bulk of the standard was taken in by Bartlett, Frazier & Co. The old oats were mostly taken by Norton, Switzer &

The oats pit was crowded during the session, but there was no frantic bidding for the much desired July oats. The largest quantity bought in one lot was taken by A. H. Farnum, representing Harris, Gates & Co. He took 450,000 bushels from W. H. Sterling, who was the Patten broker in the closing of the deal. Sterling's orders were to sell anybody as many onts as were wanted. Harvey Williams bought 200,000 bushels, Mr. Patten personally making the sale. In all possibly 1,000,000 bushels were covered in the pit, mainly at 64 cents.

#### NOT A FINANCIAL SUCCESS

Only A Small Audience Saw "The Deemster" Last Evening.

Hot summer evenings and theatri-l attractions are not an alluring combination to the public in general so perhaps it is no wonder that was a very small audience which assembled at the Myers Grand last evening to see the dramatization Hall Caine's novel, "The Deemster, as presented by Aiden Benedict's company. The play itself is rather dull and there are several places where it could be cut down to good advantage.

advantage.

The presenting company was certainly not one of starting ability, although in some instances the work was above the ordinary. W. Lawrence, as 'the bishop,' had a most pleasing voice and played the partintelligently. W. J. Schultz, as the deaf old man, and Mabel Eston, as the big billed sweethers, gave the tough his blind sweetheart, gave the touch of comedy which pleased the audience. Anna Pearl Cogswell played the part of the young heroine quite prettily and Hawlet E. Cornell, as the young parson, and Guy Durrell, as his scapegrace cousin, did some credita-ble work. The faults of the performance were due largely to the melodramatic demands of the play.

"Artists" Still at Large. Attractions "at liberty," says the Washington Times, are "the little girl with the great big voice;" "the greatonly sacred songs for Sunday concerts; a man who will furnish on demand "single, double teleform." balloons," and who intends to go down to fame as the "sole and original inventor of the human bomb, patented and copyrighted," and a lawyer who balloons," and who intends to go down makes a specialty of theatrical divorces, \$50 covering all expenses.
